WHITE PAPER

VERSION 1.0

“ De-centralized trustless, non-custodial, Layer-2 scaling solution for transferring value on Ethereum . DigiMax is Open Source, Community run and maintained DGMT. ”

DigiMax (DGMT) is a de-centralized Currency on ETHEREUM NETWORK. It is trustless, non-custodial, Layer-2 scaling solution for transferring value on Ethereum. It is Open Source. Community oriented and powered to maximize the power of the blockchain technology

DigiMax (DGMT) did not conduct any ICO but seek to improve and maximize the power of blockchain technology in creating a de-centralized currency under the ethereum network. DigiMax is designed to be majorly distributed to the community. More than 70% of token are to be strategically airdropped to the community.

By doing this we seek an attempt to start a movement of a crypto community that cannot be controlled by major whales but each person of the community adds value to the currency.

What is DigiMax (DGMT)

DigiMax is a global, digital payment method that uses blockchain technology to transfer and trade "coins." DGMT is a public resource that combines community-driven and decentralized digital currency. DigiMax is committed to adopting DigiMax on a large scale in real life. The DigiMax team is designed to encourage local businesses to accept DigiMax as a payment method and implement DigiMax into e-commerce scripts. At the consumer level, the goal is to allow users to share assets, send money, or give DigiMax as a gift to friends to realize the value of DigiMax as a public free asset.

Why DigiMax (DGMT)

DigiMax makes it more possible to scale, cut cost and inherently save time on transfers under the ethereum network this inspired the creation of DigiMax (DGMT).

Despite the challenges associated with crypto currencies, a lot of investors still want to participate in its market. To this end, DGMT is introduced as a platform for easy, fast, affordable and efficient use of Crypto. The solution is centered on giving people (DigiMax community) the ability to comfortably use crypto through a more scalable alias – DGMT.

The Scope of DigiMax (DGMT)

DigiMax is striving to be one of the leaders in adoption of digital currency for everyday use. We intend to simplify and bring the powerful peer-to-peer ledger system into the hands of people who will utilize it for everyday transactions. We regularly speak of ourselves as a community currency and enjoy the simple comments and interactions of new users to blockchain technology. We allow them to dictate how we should make things easier and more effective for their use, we desire for DGMT to remain and continue as a decentralized currency for everyone.

OUR OBJECTIVES

E-MARKET INTEGRATION

DGMT is looking to make crypto currency easily transferable and exchangeable for purchasing power. We are in talks with various companies leading the way forward to integration with all major existing e-commerce online platforms. So our goal is to have DGMT available to be used by small businesses or websites.

OUR OBJECTIVES *Continued.*

PROJECT UPGRADE

We are currently utilizing the Ethereum blockchain as we have started an ERC20 token under their system. Our total supply of tokens is 1 billion with a decimal point of 18 and our contract address is **0x0d4b4DA5fb1a7d55E85f8e22f728701cEB6E44C9**. The Ethereum platform is trusted and utilized by very large companies and is a very forward thinking blockchain.

We have discussed amongst developers the need to continue to evaluate the long-term durability of the ETH blockchain and if in the future we need to start our own blockchain, we have not closed the door to this possibility depending on the adoption rate of DGMT.

WORLD WIDE COMMUNITY BASED

DigiMax has, since its foundation, been a world-wide currency. Developers from many countries, advisors, investors, innovators and volunteers on social media have been from varied parts of the world. We are excited to have team members joining from all walks of life and social status to be a part of DGMT.

OUR OBJECTIVES *Continued.*

USABILITY AND USER EDUCATION

DigiMax will make blockchain technology less daunting for the end user and give people renewed confidence in this pioneering way of transferring funds through a peer to peer digital network. Also Digimax DGMT understands the need to educate people on blockchain technology in a simple user-friendly fashion. This objective is close to the heart of the project in putting people and their needs first in ensuring adoption of the technology is easy and even fun.

Why use DigiMax (DGMT)

Community+

Run by the community

Extremely Fast

Super speed erc20 Chain

Transparent

A blockchain you can trust

Secured

Safe Storage and Transfer of digital Assets

Inclusive

Democratic entry price, allowing everyone to participate

DigiMAX + Trust wallet

DigiMAX uses Trust Wallet which is a State-of-the-art wallet that provides various social features to increase engagement among users which improves security of the decentralized network.

ROADMAP

2ND Quarter of 2020-

Addition of 1-2 smaller exchanges for more liquidity for DigiMAX and investment potential.

3RD Quarter of 2020-

Addition of 1-2 medium sized exchanges for more liquidity for DigiMAX and investment potential (and also focuses on price growth).

Reaching out to other like-minded community focused blockchain for ways to work together

We expect price growth over this period of time with our currency being listed on CoinMarketCap and other Coin Price listing sites.

Continued development of native DigiMAX (DGMT) IOS and Android Wallet APP.

4TH Quarter of 2020-

Addition of 1-2 medium sized exchanges for more liquidity for DigiMAX and investment potential.

Partnership with E-commerce integration of DigiMAX for small businesses and online spending.

Release of the native DigiMAX DGMT IOS and Android Wallet APP.

1ST Quarter of 2021-

Addition of 1-2 larger exchanges for more liquidity for DigiMAX and investment potential.
